MARCH KITCHEN WORKTABLES

Developed in collaboration with Matt Bear of Union Studio, MARCH Kitchen Worktables are hand made in California. Combining the lines and lightness of a kitchen table with accessories for tools and storage, our worktables are an alternative to the monolithic kitchen island.

ORDERING A TABLE

Each order begins with a consultation to determine the client's size and material requirements. A drawing and price quote are then prepared for review and approval. Once approved, MARCH requires approximately 12 weeks to complete the order.

DEFINING THE TABLE

A bespoke table is created by choosing from the materials and finishes on the next page. Typically 36" in height and working on a grid of 21" wide by 42" long, the table size can be scaled as needed.

CUSTOM ACCESSORIES

The tables have been designed to incorporate add-on elements such as slatted shelves, zinc bins, boxes, baskets and hanging leather components. These accessories either fit into place in the base of the table or can be hung from the towel rod. Accessories can be moved from one place on the table to another. Additional information is available in the Kitchen Worktable Accessories page.
